Petfood

OVERVIEW

Prime100 installs Eco-Efficient Steriflow Systems for Major Pet Food Manufacturer

ESKO sold and installed two Steriflow retorting systems for a major pet food manufacturer, covering all phases from sales consultation to final commissioning. This end-to-end service ensured a customised and efficient installation process, aligning perfectly with the manufacturer's specific needs.

The Steriflow systems introduced by ESKO incorporate a unique cascading water system, enhancing both environmental sustainability and operational efficiency. This system recycles 100% of the generated steam, reducing waste and promoting green production practices, aligning the pet food manufacturer with eco-friendly initiatives.

Key Benefits:

- Full-service delivery from sales consultation to commissioning.
- Tailored installation to meet specific manufacturer needs.
- Steriflow systems with advanced cascading water feature.
- 100% steam recovery for increased sustainability.
- Enhanced production efficiency through innovative technology.
- Reduced waste and eco-friendly production practices.
